EDUCATION

Rajiv Gandhi University of Knowledge Technologies (RGUKT)

B.Tech in Computer Science Engineering

Expected Graduation: 2027

CGPA: 9.12/10

TECHNICAL SKILLS

Programming: Python, C, TypeScript

Web: HTML, CSS, React, Next.js

Libraries/Frameworks: Django, Tailwind CSS, NumPy, Pandas, OpenCV, Chart.js

Tools: Git, GitHub, VS Code, Vercel, MS Excel

Core: Machine Learning, Data Analysis, OOP

EXPERIENCE

Data Analyst Intern

Bluestock Fintech

May 2026 – Jul 2026

Remote

- Developed the Mutual Fund Analytics Platform to analyze and visualize mutual fund datasets.
- Performed data cleaning, preprocessing, and exploratory data analysis using Python and Pandas.
- Created interactive dashboards and visualizations to derive insights from financial datasets.
- Collaborated with the project team using GitHub while completing internship deliverables.

Content Writing Intern

InAmigos Foundation

May 2026 – Jun 2026

Remote

- Created articles and social media content supporting CSR initiatives focused on animal welfare.
- Collaborated with the content team to deliver engaging content within project timelines.

PROJECTS

AI Commerce OS | *Next.js, React, TypeScript, Tailwind CSS*

- Developed an AI-powered e-commerce dashboard with **6+ modules**: analytics, product catalog, cart, checkout, orders, and confirmation.
- Built reusable React components and responsive UI using TypeScript and Tailwind CSS.
- Version controlled with Git/GitHub and deployed on Vercel.
- Repository

Live Demo

PocketPal – Personal Finance Management System | *HTML, CSS, JavaScript, Chart.js*

- Built an expense management application supporting budget tracking, category-wise analytics, search, CSV export, and transaction history.
- Designed an interactive dashboard with real-time spending insights and Local Storage persistence.
- Repository

AgriSmart | *Python, Django, ML*

- Built a crop recommendation system using soil pH, temperature, rainfall, and weather parameters.
- Integrated the ML model with Django, achieving **85% prediction accuracy**.

Automated Multi-Crack Area Estimation | *Mask R-CNN, OpenCV*

- Developed an automated road crack detection system using Mask R-CNN and ArUco markers.
- Applied annotation, preprocessing, and augmentation, achieving **75% detection accuracy**.

CERTIFICATIONS

- NPTEL Cloud Computing — Elite + Gold — Top 1% — Score: 95
- NPTEL Artificial Intelligence: Search Methods for Problem Solving — Elite
- NPTEL Statistical Foundation for Big Data Analysis — Elite
- NPTEL Object-Oriented System Development Using UML, Java and Patterns — Elite
